

1. What this dataset represents

This is a **business performance dataset** that tracks:

- Sales & Profit performance
- Target vs actual achievement
- Customer activity
- Customer satisfaction
- Time (Month, Quarter)
- Geography (Region, Country)

Basically: **“How well the business is performing across regions and time”**

Dataset Summary

Column	Meaning
Date	Transaction date
Region	Area (East, West, North, South)
Sales	Actual sales amount
Profit	Profit earned
Target Sales	Expected sales
No of Customers	Total customers
Sales Completion Rate	Sales / Target
Profit Completion Rate	Profit efficiency
Customer Completion Rate	Customer target achievement
Country	Country name
Customer Satisfaction	Feedback category
Score	Rating (out of 10)
Months	Month
Quarters	Quarter

Objective

Create an **interactive Excel Dashboard** that answers key business questions using charts, KPIs, and filters.

Tasks (Questions to Solve)

1. Sales vs Target Analysis

Create a chart to answer:

- What is the **monthly Sales vs Target Sales**?
 - Which month has the **highest and lowest sales**?
 - Is the company meeting its targets?
-

2. Monthly Customer Trend

Analyze:

- How do customers vary **month-wise**?
 - Identify **peak and low months**
-

3. Country-wise Sales Distribution

Find:

- Which country contributes the **most to total sales**?
 - What is the **percentage contribution of each country**?
-

4. KPI Summary

Calculate and visualize:

- Total Sales
 - Total Profit
 - Total Target Sales
-

5. Customer Satisfaction Analysis

Answer:

- Which factor has the **highest dissatisfaction/feedback share**?
 - Rank all factors (Speed, Hygiene, etc.)
-

6. Region-wise Performance

Compare:

- Sales vs Profit across regions
 - Identify:
 - Best performing region
 - Worst performing region
-

7. Completion Metrics (Important KPIs)

Calculate:

- Sales Completion Rate
 - Profit Completion Rate
 - Customer Completion Rate
-

8. Add Interactivity

Add filters for:

- Quarter
- Region (optional)
